

# DIEGO FERNANDO PALACIOS CASTRO

## Electronic Engineer

Cali, Colombia | +57 3137464587 | [ing.diegopalacios@outlook.com](mailto:ing.diegopalacios@outlook.com) | [linkedin.com/in/dfpalacios/](https://www.linkedin.com/in/dfpalacios/)  
| [github.com/df-palacios](https://github.com/df-palacios) | [www.dfpalacios.cloud](https://www.dfpalacios.cloud)

Electronic engineer with experience in full stack web development using the MVC pattern with REST APIs, SQL databases, agile methodologies, data analysis with Excel and Power BI, automated software testing with Selenium, configuration of GPON communication networks, technical support of equipment and conversational English.

### Skills

**Programming languages and frameworks:** Python, Laravel, JavaScript, node.js, react.js, Java.

**Tools:** Git, postman, JIRA, Jest, Claude, cursor, copilot, Ollama, LMstudio, Selenium.

**Methodologies:** MVC, SOLID, clean code, SCRUM, RUP.

**Languages:** Spanish (native), English (advanced)

### Work Experience

#### Operations Agent (QA / Software Tester)

Seeusatours Colombia

May 2025 – January 2026

I executed and automated software tests using selenium, analyzed data from XML files, and managed JIRA tickets to identify and report to the development team the root causes of availability, pricing, and service issues provided by hotel and tourism agencies consuming the Juniper API, improving the booking price and availability accuracy from 54% to 90%

#### Full-Stack Developer

Redes Tevesat SAS

November 2024 – January 2025

Developed a Christmas raffle system using MySQL, React, and Laravel (MVC) to reward ISP customers who were up to date with their payments. Additionally, I configured the company's network equipment as well as client network devices.

#### Full-Stack Web3 Developer

Freelance

August 2023 – October 2024

Integrated web applications with smart contracts using Node.js for backend logic, React for frontend development, and Solidity for smart contracts, leveraging blockchain technology for online betting platforms and electronic money solutions.

#### Back-End Developer

Carvajal Tecnología y Servicios

January 2023 – July 2023

Worked on the LegalAI project, correcting bugs and implementing new features using Laravel, MongoDB, and Postman. The project was managed using SCRUM, Azure DevOps, and Git.

### Education

Electronic Engineering | Universidad del Valle | 2024

### Courses

Intermediate Excel, Comfenalco Valle, 2026

Blockchain and Cryptoassets, UxTIC | 2022 , Chainlink Labs | 2024
