Electronic engineer with experience in full-stack software development, testing, and test automation. Proficient in MVC architectures, REST APIs, Selenium, Serenity BDD, Playwright, Karate DSL, Screenplay, and POM. Experienced in data analysis, functional validation, web and API test automation, defect identification, and working within agile methodologies.

### Skills

**Programing languages and frameworks:** Java, Python, JavaScript, TypeScript, Node.js, React.js, Laravel.

**QA/Testing:** Selenium, Serenity, Playwright, Karate DSL, Postman, APIs REST, Screenplay, POM.

**Data Analysis and BI:** SQL, Power BI, Excel.

**Tools:** Git, GitHub, Jira, Azure DevOps, Jest, Copilot, Cursor, Claude, Ollama, LM Studio.

**Methodologies:** SCRUM, BDD, MVC, SOLID, Clean Code.

**Languages:** Spanish (native), English (advanced)

### Work Experience

#### Operations Agent (QA / Software Tester)

Seeusatours Colombia

May 2025 – January 2026

I executed and automated software tests using selenium, analyzed data from XML files, and managed JIRA tickets to identify and report to the development team the root causes of availability, pricing, and service issues provided by hotel and tourism agencies consuming the Juniper API, improving the booking price and availability accuracy from 54% to 90%

#### Full-Stack Developer

Redes Tevesat SAS

November 2024 – January 2025

I developed a web application for managing promotional campaigns using React, Laravel, and MySQL under an MVC architecture. I also implemented automation scripts and SSH connections to support fiber optic network equipment, improving service stability and performance for over 3,000 users.

#### Full-Stack Web3 Developer

Freelance

August 2023 – October 2024

I participated in the development and quality assurance of decentralized applications using React, Node.js, and Solidity. I designed and executed automated smart contract tests with Foundry and Hardhat, validating business logic, integrations, and API behavior. Additionally, I implemented digital traceability and digital asset management solutions, contributing to early bug detection and application stability.

#### Back-End Developer

Carvajal Tecnología y Servicios

January 2023 – July 2023

I participated in the development and maintenance of the LegalAI project using React, Node.js, NestJS, and MongoDB. I implemented new features, fixed bugs, and integrated REST APIs, working under the SCRUM methodology with Azure DevOps and Git for managing the development lifecycle.

### Education

Electronic Engineering | Universidad del Valle | 2024

### Courses

Intermediate Excel, Comfenalco Valle, 2026

Blockchain and Cryptoassets, UxTIC | 2022 , Chainlink Labs | 2024
